

Requirements for Use of the new JIS Mark

- 1 The new JIS Mark is displayed below. The certified organization may use the mark on its labels, stationary, packaging and products.
- 2 The mark may be applied by printing, embossing, engraving, tagging or other appropriate method which is durable and presentable. The certified organization must send ATCA a sample design of its use of the mark for approval.
- 3 ATCA assessors will monitor that the mark is being displayed appropriately by the certified organisation based on the certification agreement. ATCA requires that the items listed under 1) to 3) below are displayed in the vicinity of the certification mark.
 - 1) The Japan Industrial Standard number
 - 2) The Japan Industrial Standard type or class (only when display items are stipulated relating to types or classes in the relevant Japan Industrial Standard.)
 - 3) The name or abbreviation of ATCA.

The relevant Japan Industrial Standard number can be omitted, however, if the number of the Japan Industrial Standard to which the product conforms can be identified by the product shape, or from other items displayed on the product, its packaging, container, or invoice.

- 4 In addition, the following items applicable to the certified organisation and product must be appended to and displayed along with the above information.
 - 1) items stipulated in the Japan Industrial Standards eg Type 30, Type U, F***
 - 2) Name of the RCB or the certification number
 - 3) Date of manufacture or abbreviation
 - 4) Name or abbreviation of manufacturer
 - 5) Name or abbreviation of plant or work yard (identification mark if there are multiple plants or work yards)
 - 6) For lots or batches, the identification number or code
- 5 JIS Mark symbol & example of use

Certified to JIS A 5905
